

WEST NILE VIRUS AND OTHER MOSQUITO-BORNE DISEASE NATIONAL SURVEILLANCE REPORT

2014 - FINAL

WEST NILE VIRUS IN CANADA

HUMANS

During the 2014 West Nile virus season, three provinces (Manitoba, Ontario and Quebec) reported human cases of West Nile virus to the Public Health Agency of Canada. No fatalities were reported.

A total of 21 human clinical cases of West Nile virus were reported in Canada: five in Manitoba [Interlake-Eastern Health Region (1), Prairie Mountain Health Region (2)*, Southern Health Region (1) and Winnipeg Health Region (1)], 10 in Ontario [Chatham-Kent (1), Halton Region (2), Lambton County (1), City of Ottawa (2), Simcoe-Muskoka District (1) and City of Toronto (3)] and six in Quebec [Lanaudière (1), Montérégie (3) and Montreal (2)].

Of the 21 human clinical cases, 10 (47.6%) were classified as West Nile virus non-neurological syndrome, nine (42.9%) as West Nile virus neurological syndrome and two (9.5%) as unclassified/unspecified.

One asymptomatic infection was reported in Ontario: Windsor-Essex County.

* One of these cases was likely exposed prior to the 2014 West Nile virus season.

MOSQUITOES

A total of 219 mosquito pools tested positive for West Nile virus in Canada: 24 in Manitoba [Interlake-Eastern Health Region (7), Prairie Mountain Health Region (1), Southern Health Region (11) and Winnipeg Health Region (5)]; 56 in Ontario [Haliburton-Kawartha-Pine Ridge District (1), Halton Regional (3), City of Hamilton (7), Lambton (1), Middlesex-London (4), Niagara

Regional (2), City of Ottawa (3), Peel Regional (22), City of Toronto (10), Windsor-Essex County (1) and York Regional (2)]; 119 in Quebec [Laval (13), Montérégie (42) and Montreal (64)] and 20 in Saskatchewan [Sun Country, Regina Qu'Appelle, Five Hills, Cypress, Heartland Health Regions].

DEAD BIRDS

The [Canadian Wildlife Health Cooperative](#) tested a total of 130 dead birds for West Nile virus in Canada: Manitoba (1), Northwest Territories (1), Ontario (31), Quebec (26) and Saskatchewan (71).

Of these, 18 (13.8%) dead birds tested positive for West Nile virus in Canada: Ontario (6), Quebec (10) and Saskatchewan (2).

DOMESTIC ANIMALS

The [Canadian Food Inspection Agency](#) reported a total of 21 horses tested positive for West Nile virus in Canada: Alberta (7), Manitoba (1), Ontario (1), Quebec (4) and Saskatchewan (8).

WEST NILE VIRUS HUMAN DISEASE CASES IN THE UNITED STATES

As of January 13, 2015, the [Centers for Disease Control and Prevention \(CDC\)](#) reported 2,122 West Nile virus human disease cases:

Alabama (2), Arizona (104), Arkansas (11), California (787), Colorado (114), Connecticut (6), District of Columbia (3), Florida (16), Georgia (12), Idaho (18), Illinois (40), Indiana (9), Iowa (15), Kansas (51), Kentucky (1), Louisiana (111), Maryland (6),

ISSN: 2368-2841

Public Health

Canada

Massachusetts (6), Michigan (1), Minnesota (21), Mississippi (43), Missouri (13), Montana (5), Nebraska (140), Nevada (3), New Jersey (7), New Mexico (24), New York (22), North Dakota (22), Ohio (11), Oklahoma (18), Oregon (8), Pennsylvania (12), South Carolina (2), South Dakota (57), Tennessee (15), Texas (353), Utah (2), Virginia (7), Washington (12), Wisconsin (7) and Wyoming (5).

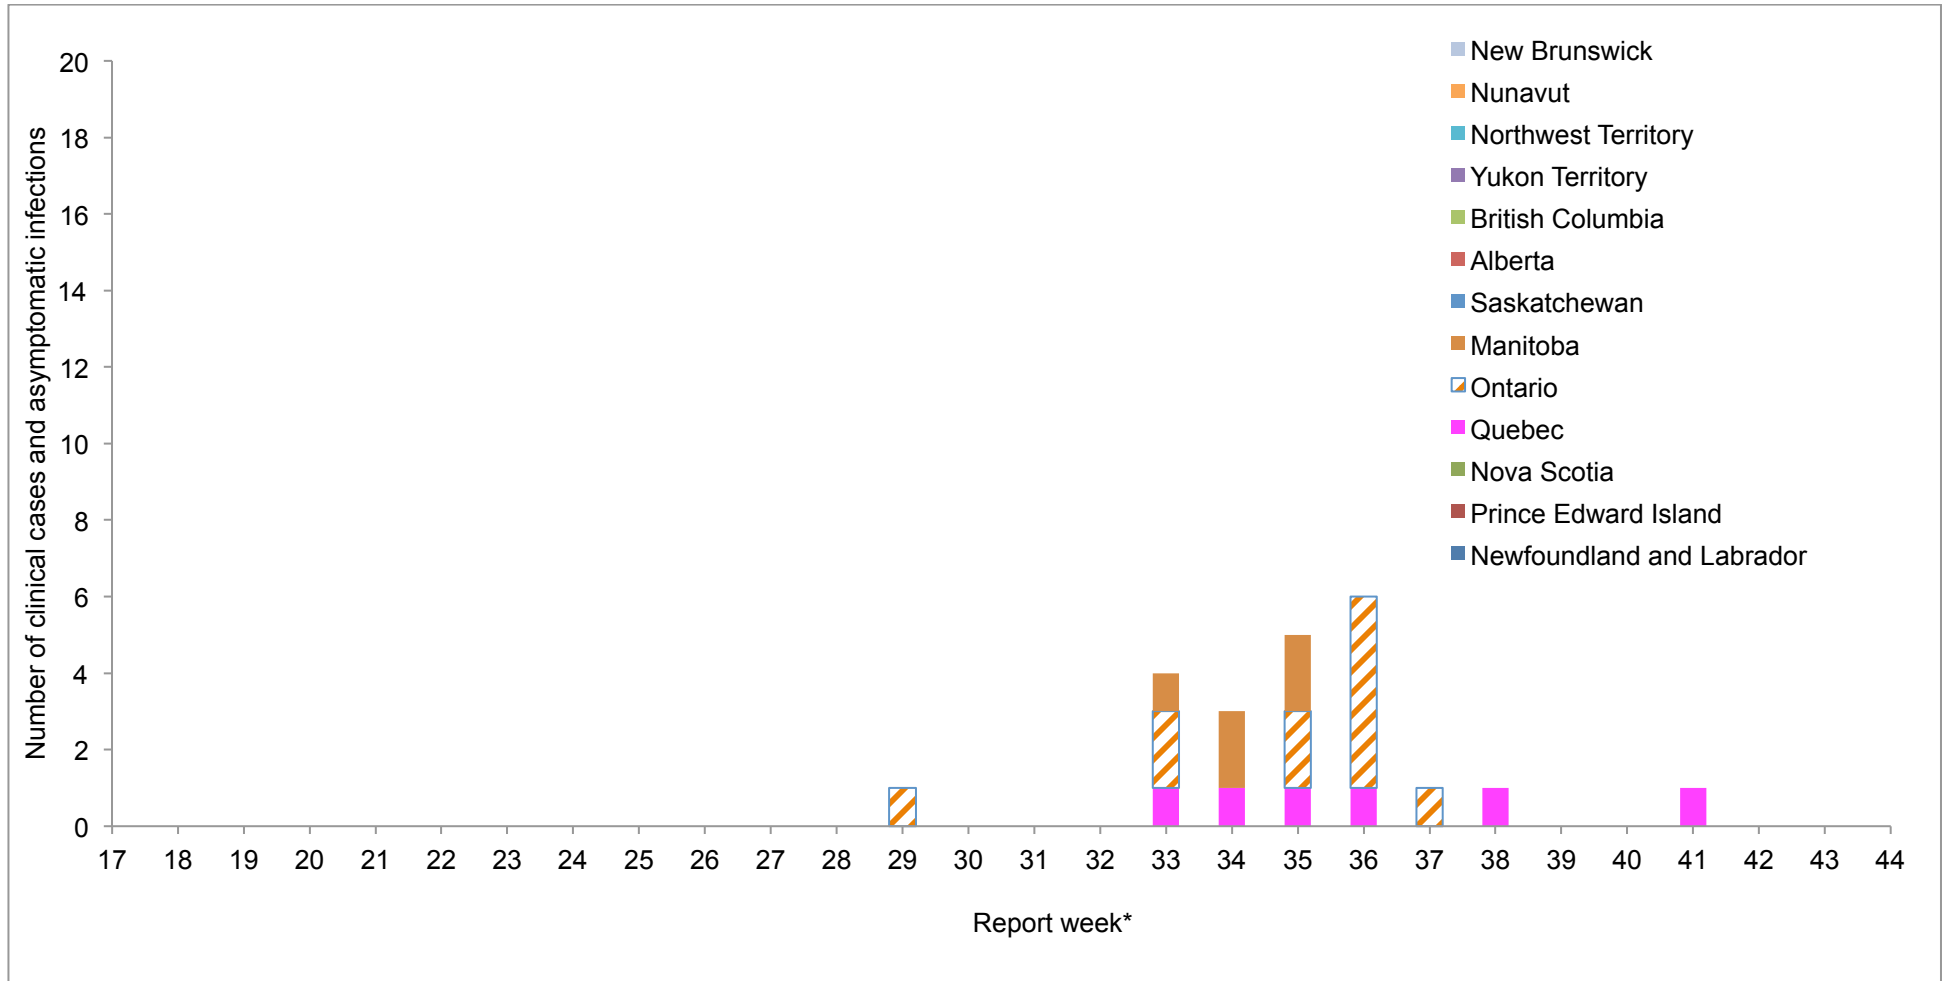

Of these, 1,283 (60.5%) were diagnosed as neuroinvasive disease cases and 839 (39.5%) as non-neuroinvasive disease cases. Eighty-five fatal cases were reported. Three hundred and thirty-seven presumptive viremic blood donors have been identified.

WEST NILE FEVER IN THE EUROPEAN UNION, EUROPEAN ECONOMIC AREA AND NEIGHBOURING COUNTRIES

As of November 20, 2014, the [European Centre for Disease Prevention and Control \(ECDC\)](#) reported a total of 74 human cases of West Nile fever in Europe: Austria (1), Greece (15), Hungary (11), Italy (24) and Romania (23).

In the neighbouring countries and regions, a total of 136 human cases have been reported: Bosnia and Herzegovina (13), Gaza (1), Israel (17), Russian Federation (29) and Serbia (76).

FIGURE 1: West Nile Virus clinical cases and asymptomatic infections, by Province/Territory and report week, 2014 season

* West Nile virus clinical cases and asymptomatic infections are grouped by report week, based on episode date. Episode date could include one of the following: onset date, diagnosis date, lab sample date or reporting date.

Total	9	10*	2	21*	2	1

¹ Total clinical cases is the sum of both probable and confirmed: West Nile virus neurological and non-neurological syndromes, along with any unclassified or unspecified cases.

² Likely related to travel outside the Province/Territory. These cases are included in either the total clinical cases or West Nile virus asymptomatic infections.

³ Satisfies West Nile virus diagnostic test criteria in the absence of clinical criteria. This category could include asymptomatic blood donors whose blood is screened using a nucleic acid amplification test, by blood operators (i.e. Canadian Blood Services or Hema-Quebec) and is subsequently brought to the attention of public health officials. Blood operators in Canada perform a supplementary West Nile virus specific nucleic acid amplification test following any positive donor screen test result.

* One of these cases was likely exposed prior to the 2014 West Nile virus season.

WEST NILE VIRUS AND OTHER MOSQUITO-BORNE DISEASE NATIONAL SURVEILLANCE REPORT

2014 - FINAL

EASTERN EQUINE ENCEPHALITIS IN CANADA

DOMESTIC ANIMALS

The [Canadian Food Inspection Agency](#) reported a total of 28 cases of Eastern Equine Encephalitis in Canada: Nova Scotia (1), [Ontario](#) (25) and [Quebec](#) (2).

Of these, 27 cases (96.4%) were reported in horses and one (3.6%) case was reported in an emu in Ontario.
