

# HELP REDUCE THE SPREAD OF ANTIMICROBIAL RESISTANCE

Follow recommendations for routine practices in settings where health care is provided

Point-of-care risk assessment

Hand hygiene

Use of personal protective equipment

Source control

Aseptic technique

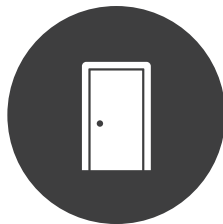

Sharps safety and prevention of exposure to bloodborne pathogens

Cleaning and disinfection of non-critical patient care equipment

Environmental cleaning

Handling linen, waste, dishes and cutlery

Patient placement and accommodation

Patient flow

Visitor management

Education of patients, families and visitors

Handling deceased bodies

To learn more about infection prevention and control in healthcare settings, refer to: *Routine practices and additional precautions for preventing the transmission of infection in healthcare settings* available at
