Canada's balance of international payments, first quarter 2008

The current account surplus with the rest of the world (on a seasonally adjusted basis) increased sharply to \$5.5 billion in the first quarter of 2008, led by higher prices for several export commodities combined with a lower import deficit. In the financial account, foreign investment flows into Canada slowed significantly from the expansion-driven pace of the previous quarter, while Canadian direct investment abroad continued to strengthen.
