Census maps

2006

The Atlas of Canada, produced by Natural Resources Canada in partnership with Statistics Canada, presents a series of maps and accompanying analysis of national and regional data results from the 2006 Census. The first releases focus on Canadian population, age, marital status, immigration, visible minorities and mode of transportation. The maps are available on the Atlas of Canada website (<http://atlas.nrcan.gc.ca/site/english/featureditems/index.html>).

Future releases will cover topics such as educational attainment, the labour force, languages, housing and income.

For more information, contact Andrea Levett (613-951-0246), Census Subject Matter Secretariat.

Other questions related to the Internet presentation and/or functionality should be directed to Anna Jasiak (613-996-2817), Natural Resources Canada.

Crude oil and natural gas: Supply and disposition

July 2009 (preliminary)

Domestic production of crude oil and equivalent hydrocarbons totalled 13.3 million cubic metres in July, down 4.1% from July 2008.

Crude oil and equivalent exports were up 15.0% compared with the same month in 2008. About 75% of Canada's total domestic production went to the export market.

Marketable natural gas production totalled 11.7 billion cubic metres in July, down 8.7% from the same month a year earlier. Domestic sales of natural gas rose by 0.9% from the same month a year earlier.

Natural gas exports fell by 2.8% in July compared with the same month in 2008. Exports accounted for about 68% of marketable natural gas production.

Available on CANSIM: tables 126-0001 and 131-0001.

Definitions, data sources and methods: survey number 2198.

Note: Preliminary data are available on CANSIM at the national level to July 2009 inclusive. At the national and provincial level detailed information is available for crude oil (126-0001) up to May 2009 inclusive, and for natural gas (131-0001) up to March 2009 inclusive.

^E use with caution

1. Disposition may differ from supply because of inventory change, own consumption, losses and adjustments.

2. Data may differ from International Trade Division estimates because of timing and the inclusion of crude oil landed in Canada for future re-export.

3. Volumetric receipts at refineries of all domestic and imported crude oils for refinery processing or storage.

4. Disposition may differ from supply because of inventory change, usage as pipeline fuel, pipeline losses, line-pack fluctuations.

5. Receipts from fields after processing for the removal or partial removal of some constituents and impurities and that meet specifications for residential, commercial and industrial use; and including other adjustments.

6. Domestic sales includes residential, commercial, industrial and direct sales (for example direct, non-utility, sales for consumption where the utility acts solely as transporter).

Commercialization of intellectual property in the higher education sector

2007

Canadian universities and affiliated teaching hospitals reported more than \$52 million as income from intellectual property in 2007, down 12% from 2006.

In 2007, researchers reported or disclosed 1,357 new inventions to Canadian universities and teaching hospitals, a number virtually unchanged from the previous year. There were 1,634 patent applications filed with educational institutions, up 13% from 2006.

Available on CANSIM: table 358-0025.

Definitions, data sources and methods: survey number 4222.
