The "domestic" and "other international" sectors experienced growth in passenger traffic in 2008. However, the "transborder" (Canada–United States) sector contracted 1.5%.

Accounting services price indexes

2006

The Accounting Services Price Index (ASPI, 2000=100), which measures the change in the price of accounting services including auditing, tax preparation and bookkeeping, is now available for 2006.

The ASPI increased 4.1% to 124.1 in 2006, up from the 3.9% increase in 2005. Prices for accounting services in 2006 were 31.6% higher than they were in 1999, when the indices were first established.

All accounting service categories registered price increases in 2006, ranging from gains of 2.8% for bookkeeping, compilation and general accounting services to 7.8% for tax preparation services for individuals and unincorporated businesses.

Strong economic growth and generally higher prices in Alberta contributed to a significant 9.3% rise in accounting service prices in that region, the largest increase across Canada. Second to that was a 4.7% increase in the Atlantic region, while prices in Ontario (+3.3%) grew the least in 2006.

The ASPI series are disseminated both nationally and by region.

Available on CANSIM: table 326-0014.

Definitions, data sources and methods: survey number 2334.
