1. Disposition may differ from supply because of inventory change, own consumption, losses and adjustments.

2. Data may differ from International Trade Division estimates because of timing and the inclusion of crude oil landed in Canada for future re-export.

3. Volumetric receipts at refineries of all domestic and imported crude oils for refinery processing or storage.

4. Disposition may differ from supply because of inventory change, usage as pipeline fuel, pipeline losses, line-pack fluctuations.

5. Receipts from fields after processing for the removal or partial removal of some constituents and impurities and that meet specifications for residential, commercial and industrial use; and including other adjustments.

6. Domestic sales includes residential, commercial, industrial and direct sales (for example direct, non-utility, sales for consumption where the utility acts solely as transporter).
