

# Tax tip

## Non-resident Corporation returns

### ***Did you know...***

That you can now file Non-Resident income tax returns electronically using the same convenient, secure, and fast Corporation Internet Filing service as other eligible corporations?

The benefits of filing electronically include receiving an immediate confirmation of receipt, faster processing of returns, and receiving refunds faster. Non-resident corporations are eligible to use the Corporation Internet Filing service when they are claiming an exemption under an income tax treaty and/or earning income from a business carried out in Canada through a branch office. A tax services professional can also use EFILE to file your return.

For more information about your electronic filing options, go to [www.cra-arc.gc.ca/electronicservices](http://www.cra-arc.gc.ca/electronicservices).

You can view the status of your return, access the account balance and transactions, and get access to other services for corporation income tax accounts online through My Business Account. For more information, go to [www.cra.gc.ca/mybusinessaccount](http://www.cra.gc.ca/mybusinessaccount).
