

Supplementary Estimates (B), 2012-13

For the
Fiscal year ending
March 31, 2013

The Estimates Documents

Each year, the government prepares Estimates in support of its request to Parliament for authority to spend public funds. This request is formalized through the introduction of appropriation bills in Parliament. The Estimates, which are tabled in the House of Commons by the President of the Treasury Board, consist of the following:

Part I – The Government Expenditure Plan provides an overview of federal spending and summarizes the key elements of the Main Estimates.

Part II – The Main Estimates directly support the Appropriation Act. The Main Estimates identify the spending authorities (Votes) and amounts to be included in subsequent appropriation bills. Parliament will be asked to approve these Votes to enable the government to proceed with its spending plans. Parts I and II of the Estimates are tabled on or before March 1.

Part III – Departmental Expenditure Plans are divided into two components:

- 1) **Reports on Plans and Priorities (RPP)** are individual expenditure plans for each department and agency (excluding Crown corporations). These reports provide increased levels of detail over a three-year period on an organization's main priorities by strategic outcome(s), program activity(ies) and planned/expected results, including links to related resource requirements. The RPPs also provide additional details on risk management, operational and management priorities, transformational projects and grants and contributions, etc. They are tabled in Parliament in the spring by the President of the Treasury Board on behalf of the ministers who preside over the appropriation-dependent departments and agencies identified in Schedules I, I.1 and II of the *Financial Administration Act*. These documents are referred to committees, which may then report to the House of Commons pursuant to Standing Order 81(7).
- 2) **Departmental Performance Reports (DPR)** are individual department and agency accounts of results achieved against planned performance expectations as set out in respective RPPs. These Performance Reports, which cover the most recently completed fiscal year, are tabled in Parliament in the fall by the President of the Treasury Board on behalf of the ministers who preside over the appropriation-dependent departments and agencies identified in Schedules I, I.1 and II of the *Financial Administration Act*.

Supplementary Estimates directly support an Appropriation Act. The Supplementary Estimates identify the spending authorities (Votes) and amounts to be included in the subsequent appropriation bill. Parliamentary approval is required to enable the government to proceed with its spending plans. Supplementary Estimates are normally tabled three times a year, the first document in May, the second in late October and the final in late February. Each Supplementary Estimates document is identified alphabetically A, B, C, etc. In special circumstances, more than three Supplementary Estimates documents can be published in any given year.

The Estimates, along with the Minister of Finance's Budget, reflect the government's annual budget planning and resource allocation priorities. In combination with the subsequent reporting of financial results in the Public Accounts and of accomplishments achieved in DPRs, this material helps Parliament hold the government to account for the allocation and management of public funds.

Introduction to Supplementary Estimates

Structure of these Supplementary Estimates

This Supplementary Estimates document is presented in four sections:

1. *Introduction to Supplementary Estimates;*
2. *Summary Tables;*
3. *Details by Department, Agency and Crown Corporation;* and
4. *Annex.*

Purpose and General Information

Each year, the government prepares Estimates in support of its request to Parliament for authority to spend public funds. This request for spending authority is formalized through the introduction of appropriation bills in Parliament. The Main Estimates and Supplementary Estimates are tabled in the House of Commons by the President of the Treasury Board and support Parliament's consideration of the appropriation bills. As with other bills, appropriation bills become law after being approved by both the House of Commons and the Senate and receiving Royal Assent.

The purpose of Supplementary Estimates is to present to Parliament information on the Government of Canada's spending requirements which were either not sufficiently developed in time for inclusion in the Main Estimates, or have subsequently been refined to account for developments in particular programs and services.

Supplementary Estimates also provide updated information on changes to expenditure forecasts of major statutory items as well as on such items as: transfers of money between Votes; debt deletion; loan guarantees; new or increased grants; and changes to Vote wording.

Supplementary Estimates documents are tabled in Parliament in advance of the related Appropriation Act that provides the necessary authority for the Government of Canada to spend monies from the Consolidated Revenue Fund to carry out its programs and services. This is intended to provide the various Standing Committees of Parliament with sufficient time to review proposed spending before the introduction of the Appropriation Act.

It is the practice to table a Supplementary Estimate for each of the three Parliamentary Supply periods ending June 23, December 10, and March 26. These Supplementary Estimates (B) are the second of three Supplementary Estimates planned for this fiscal year.

Introduction to Supplementary Estimates

Summary of Estimates to Date – Fiscal Year ending March 31, 2013

Royal Assent for *Appropriation Act No. 1, 2012–13* was granted on March 29, 2012 and provided interim supply to departments, organizations and appropriation-dependent Crown Corporations until the end of June 2012. Royal Assent for *Appropriation Act No. 2, 2012–13* was granted on June 28, 2012 and provided supply for the remaining amounts presented in Main Estimates.

Introduction to Supplementary Estimates

Major Items

The following section provides an overview of major items included in these Supplementary Estimates.

Major voted initiatives included in these Supplementary Estimates requiring Parliamentary approval:

Voted items

Funding for the federal costs of Contract Policing services for all contract jurisdictions

This funding will be used to support the federal government's share of costs under the new Police Services Agreements that came into force on April 1, 2012 for a period of up to 20 years. The agreements commit the federal government to provide Royal Canadian Mounted Police policing services, on a cost-recovery basis, to eight provinces, three territories and approximately 150 municipalities.

Royal Canadian Mounted Police
\$242.4 million

To maintain the provision of supplementary health benefits to eligible First Nations and Inuit

This funding will be used to sustain basic service levels in the Non-Insured Health Benefits (NIHB) program – a demand-driven insurance plan that funds benefit claims for a limited range of medically-necessary health-related goods and services for 896,000 eligible First Nations and Inuit. It includes funding to cover NIHB costs associated with existing clients, new clients resulting from the recent creation of the Qalipu Mi'kmaq First Nations band in Newfoundland and Labrador, and new clients arising from the *Gender Equity in Indian Registration Act*.

Health
\$226.4 million

Funding for the Canadian Forces Service Income Security Insurance Plan as a result of a Federal Court decision on the Manuge class-action lawsuit

These funds are a payment to Manulife Financial to enable compliance with the May 2012 Federal Court decision on the Manuge class-action lawsuit regarding Canadian Forces Service Income Security Insurance Plan Long Term Disability benefits. Manulife Financial increased payments to active claimants in June 2012. The payment will reimburse Manulife for increasing payments over the remaining duration of recipient's claims. Negotiations continue with respect to retroactive payments.

National Defence
\$205.6 million

Introduction to Supplementary Estimates

Funding for the Canadian Wheat Board's transition costs such as pension and post-employment benefits, severance, legacy costs, and penalties associated with contract changes as it becomes a voluntary grain marketing organization on August 1, 2012

The Government of Canada will assist the Canadian Wheat Board with specific transition costs that result from the removal of the Canadian Wheat Board marketing monopoly on Western Canadian grain. The funds will be used by the Canadian Wheat Board to settle debts and liabilities from monopoly-era operations to ensure the viability of the Wheat Board through the transition period. These debts include pension and post-retirement benefit obligations, penalties related to changes to long-term contracts, and costs associated with the downsizing of the organization.

Agriculture and Agri-Food

\$184.2 million

Funding for mental health and emotional support services, and for the administration and research required to support the federal government's obligations under the Indian Residential Schools Settlement Agreement

Budget 2012 provides funding for the continued implementation of the Indian Residential Schools Settlement Agreement. The agreement is an out-of-court settlement between the Government of Canada, former students as well as religious and Aboriginal organizations, intended to bring a fair and lasting resolution to the legacy of the Indian Residential Schools. Funds will address cost pressures resulting from higher than anticipated number of applications, the complexity of cases, and the court-ordered addition of claims from two additional schools.

Health

\$55.9 million

Indian Affairs and Northern Development

\$125.6 million

Funding for the Disaster Financial Assistance Arrangements

In the event of a large-scale natural disaster, the Government of Canada provides financial assistance to provincial and territorial governments through the Disaster Financial Assistance Arrangements (DFAA). When response and recovery costs exceed what individual provinces or territories could reasonably be expected to bear on their own, the DFAA provide the Government of Canada with a fair and equitable means of assisting provincial and territorial governments.

Public Safety and Emergency Preparedness

\$180.0 million

Funding to continue to support the implementation of the First Nations Water and Wastewater Action Plan

These funds extend the First Nations Water and Wastewater Action Plan for the first of an additional two years, as announced in Budget 2012. Renewed funding will allow departments to continue working with First Nations communities on capital construction, operation and maintenance of water and wastewater systems, thus ensuring and preserving the integrity of those systems.

Health

\$25.6 million

Indian Affairs and Northern Development

\$136.5 million

Introduction to Supplementary Estimates

Funding for awards to claimants resulting from the Independent Assessment Process and Alternative Dispute Resolution related to the Indian Residential Schools Settlement Agreement

In 2006, funds were set aside as part of the Indian Residential Settlement Agreement to pay awards under the Alternative Dispute Resolution process and the Independent Assessment process for serious and sexual abuse. This amount was equally distributed over the six years of the Agreement with the understanding that it might need to be adjusted to reflect the timing and amount of claims and awards to be processed. As both the number of abuse-related claims and the level of payment awards continue to run significantly above what was originally expected, an adjustment in funding is needed to continue to process these court-ordered payments.

Indian Affairs and Northern Development

\$124.0 million

Funding to meet the government's commitments to the Gas Tax Fund to support environmentally sustainable municipal infrastructure projects that contribute to cleaner air, cleaner water and reduced greenhouse gas emissions

The Gas Tax Fund provides predictable and long-term funding in support of environmentally sustainable municipal infrastructure, such as: public transit; drinking water; wastewater infrastructure; green energy; solid waste management; local roads and bridges.

Office of Infrastructure of Canada

\$122.0 million

Funding to meet the government's commitments to the Provincial-Territorial Infrastructure Base Funding Program to help restore the fiscal balance while enhancing Canada's public infrastructure

Under the Provincial-Territorial Base Funding Program, each province and territory receives funding to be used for construction or rehabilitation of infrastructure. Supported infrastructure projects will contribute to efficient movement of goods and people, a cleaner environment, and safe and liveable communities.

Office of Infrastructure of Canada

\$114.6 million

Changes to Government Structure and New Authorities Being Sought

Section 31.1 of the *Financial Administration Act* provides expenditure authority for transfers of any power, duty or function or control or supervision of a portion of the federal public administration for Orders in Council made under section 2 of the *Public Service Rearrangement and Transfer of Duties Act*. Pursuant to section 31.1, unexpended money related to the transferred functions is deemed to have been appropriated to the department to which the functions have been transferred.

The deemed appropriations in the department(s) receiving the functions are established based on the nature of the appropriations of the department(s) from which the functions have been transferred. The deemed appropriations in the receiving department(s) may include operating expenditures, program expenditures, capital expenditures, grants and contributions or other Votes, as determined by the nature of the Votes of the department(s) from which the functions have been transferred.

The calculation of unexpended money depends on the nature of the functions transferred. If the final amounts of unexpended money have been determined in time for inclusion in a Supplementary Estimates, they will be reflected in adjustments to the amounts of previous authorities of the affected departments. Items for Inclusion in the Proposed Schedules to the Appropriation Bill

This table provides the reader with a preview of the Appropriation Bill. As noted previously, Supplementary Estimates directly supports the Bill. This table provides a list of Vote numbers, Vote wording and the requested funds that will be proposed to Parliament for approval. There are two schedules to the Appropriation Bill in Supplementary Estimates: Schedule 1 identifies those items for the fiscal year ending March 31, 2013 whereas Schedule 2 identifies those items for the fiscal year ending March 31, 2014.

Only positive adjustments to appropriations are included in a Proposed Schedule to the Appropriation Bill. Where funding for a Vote has netted to zero or has a negative amount displayed in these Supplementary Estimates, no change is required to existing spending authority and is not requested of Parliament. Therefore, they are not included in these schedules.

Once the Appropriation Bill is approved, the Vote wording becomes the governing conditions under which expenditures may be made. The following kinds of Votes can appear in Supplementary Estimates:

- a. Program expenditures Votes – This type of Vote is used when there is no requirement for either a separate “Capital expenditures” Vote or “Grants and contributions” Vote because neither equals or exceeds \$5 million. In this case, all expenditures are charged to the one Vote.
- b. Operating expenditures Votes – This type of Vote is used when there is a requirement for either a “Capital expenditures” Vote or a “Grants and contributions” Vote or both; that is, when expenditures of either type equals or exceeds \$5 million.
- c. Capital expenditures Votes – This type of Vote is used when capital expenditures equal or exceed \$5 million. Expenditure items in a “Capital expenditures” Vote could include individual items expected to exceed \$10,000 for the acquisition of land, buildings and works (Standard Object 8), as well as the acquisition of machinery and equipment (Standard Object 9), or for purposes of constructing or creating assets where an organization expects to draw upon its own labour and materials or employs consultants or other services or goods (Standard objects 1 to 9). Different threshold limits may be applied for different capital expenditure classes.
- d. Grants and contributions Votes – This type of Vote is used when the total of grants and contributions expenditures equals or exceeds \$5 million. It should be noted that the inclusion of a grant, contribution or other transfer payment item in Supplementary Estimates imposes no requirement to make a payment, nor does it give a prospective recipient any right to the funds. It should also be noted that in the Vote wording, the meaning of the word “contributions” is considered to include “other transfer payments” because of the similar characteristics of each.
- e. Non-budgetary Votes – This type of Vote is identified by the letter “L”, and provides authority for spending in the form of loans or advances to, and investments in, Crown corporations and loans or advances for specific purposes to other governments, international organizations or persons or corporations in the private sector.
- f. Special Votes: Crown Corporation Deficits and Separate Legal Entities – Where it is necessary to appropriate funds for a payment to a Crown corporation or for the expenditures of a legal entity, a separate Vote is established. A legal entity for these purposes is defined as a unit of government operating under an Act of Parliament and is responsible directly to a Minister.
- g. Treasury Board centrally-managed Votes – To support the Treasury Board in performing its statutory responsibilities for managing the government’s financial, human and materiel resources, a number of special authorities are required as outlined below.
 - i. Government Contingencies Vote – This Vote serves to supplement other appropriations and to provide for miscellaneous, urgent or unforeseen expenditures not otherwise provided for, including grants and contributions not listed in the Estimates and the increase of the amount of grants listed in these Supplementary Estimates. This authority to supplement other appropriations is provided until parliamentary approval can be obtained and as long as the expenditures are within the legal mandate of the organization.
 - ii. Government-Wide Initiatives Vote – This Vote supplements other appropriations in support of the implementation of strategic management initiatives in the Public Service of Canada.

Items for Inclusion in the Proposed Schedules to the Appropriation Bill

- iii. Compensation Adjustments Vote – This Vote supplements other appropriations to provide funding for the increased personnel costs of collective agreements between the Treasury Board and collective bargaining units representing public servants, as well as collective agreements signed by separate employers, including members of the Royal Canadian Mounted Police and the Canadian Forces, Governor in Council appointees and Crown corporations as defined in section 83 of the *Financial Administration Act*.
- iv. Public Service Insurance Vote – This Vote provides for the payment, in respect of insurance, pension or benefit programs or other arrangements, or in respect of the administration of such programs, or arrangements, including premiums, contributions, benefits, fees and other expenditures, made in respect of the public service or any part thereof and for such other persons, as Treasury Board determines, and authority to expend any revenues or other amounts received in respect of such programs or arrangements to offset any such expenditures in respect of such programs or arrangements and to provide for the return to certain employees of their share of the premium reduction under subsection 96(3) of the *Employment Insurance Act*.
- v. Operating Budget Carry Forward Vote – This Vote supplements other appropriations for the operating budget carry forward from the previous fiscal year.
- vi. Paylist Requirements Vote – This Vote supplements other appropriations for requirements related to parental and maternity allowances, entitlements on cessation of service or employment and adjustments made to terms and conditions of service or employment of the federal public administration including members of the Royal Canadian Mounted Police and the Canadian Forces, where these have not been provided from the Compensation Adjustments Vote.
- vii. Capital Budget Carry Forward Vote – This Vote supplements other appropriations for the capital budget carry forward from the previous year.
