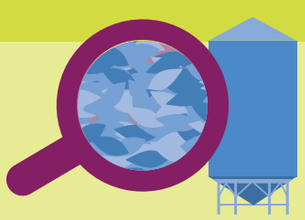
Best practices to prevent *treated seed* in deliveries

Clean up **spills** and dispose of leftover treated seed as required by your province or municipality

Clean all equipment, bins and vehicles thoroughly after seeding and before harvest



Visually **inspect** equipment and bins for treated seed:

- before **harvest**
- before transferring grains **between bins**
- before transferring grains to a **truck** or **railcar** for delivery

Use a seed bag **collection program** if one is available in your area

Use **dedicated bins** for treated seed if you can
