What's new this filing season - CVITP

Find out about the latest program updates for the 2024 filing season.

Program related updates include:

- [Virtual clinics](#)
- [EFILE](#)
- [ReFILE](#)

Virtual clinics

The CRA will continue to support virtual clinics for the 2024 filing season.

Organizations can continue to choose to also serve individuals residing in northern communities ([prescribed zones](#)) within Canada and communicate this information in their clinic posting(s) on Canada.ca.

For more information on how to prepare tax returns virtually, refer to [Procedures for tax preparation](#).

EFILE

Important dates for the upcoming filing season

EFILE transmission services are open for transmission on February 19, 2024.

Important note

It is no longer possible to electronically transmit tax returns for 2016 and the years prior.

For more information on EFILE, refer to [CRA electronic services - EFILE](#).

ReFILE

ReFILE is an online service that allows individuals, CVITP volunteers and other EFILE service providers to send online adjustment requests for tax returns. CVITP volunteers must use the UFile CVITP software.

Beginning with the 2023 tax year, if a tax return was submitted electronically and a change needs to be made, CVITP volunteers can use ReFILE to send the adjustment request.

ReFILE transmission services are open for transmission on February 19, 2024.

For more information on ReFILE, refer to CRA electronic services - [ReFILE](#).
