COVID-19

Get Tested

Being tested is the only way to know if you have COVID-19.

Some people with COVID-19 have no symptoms. Common symptoms include fever, cough, and difficulty breathing.

Health Services will swab your nose or throat. Knowing test results helps us treat symptoms, stop the spread, and resume activities more quickly.

If you are offered a test, please take it!

Get Your Vaccine

Getting vaccinated is the best way to protect yourself against COVID-19.

The COVID-19 vaccine is safe and approved by Health Canada. It is highly effective in preventing hospitalization and severe symptoms from the virus. Health Services will be offering vaccines to all inmates.

When you are offered a vaccine, please take it! It will help protect you and your loved ones.

Even when vaccinated, you must continue wearing a mask, keep physical distancing, and washing your hands often.
