ELECTRONIC HEALTH RECORD PLATFORM

# THE NEW AND IMPROVED CAF Health Record System

CFHS is enhancing the patient and clinician experience by replacing the core of the existing Canadian Forces Health Information System (CFHIS) and adding further capabilities to create a new advanced Electronic Health Record Platform (EHRP) system

The EHRP offers numerous benefits for patients and clinicians:

- Secure online portal featuring cutting-edge technology
- Patients can view and contribute to their own health record, putting them at the centre of their healthcare journey
- Thanks to AI-enabled charting apps and clinical support tools, clinicians spend less time inputting notes and more time with their patient
