

What's permitted

– With unclassified data only –

- ✓ **Write & Edit Documents:** Can help draft reports or emails.
- ✓ **Generate Briefing Materials:** Can create charts, maps, and other visuals.
- ✓ **Summarize Information & Reports:** Can condense lengthy reports.
- ✓ **Communications:** Can assist with translating documents (but expert review is needed for compliance and accuracy).
- ✓ **Client Support:** Can assist with general queries and brainstorming.

All generated content must be reviewed for accuracy and security purposes.

Using
Generative

Artificial Intelligence

in the DND/CAF

Copilot is the approved Generative AI tool.

Public tools like ChatGPT may expose sensitive data and are not secure for DND/CAF operations. Contents provided to public generative AIs are ingested by their supporting data models and subsequently aggregated and used to answer future queries.

What's not permitted

- ✗ **Process Confidential DND/CAF Data:** Do not input personal, sensitive, or protected information into public tools.
- ✗ **Legal or Military Advice:** AI cannot replace legal or military advisors for policy decisions or interpretations of regulations.
- ✗ **Fact-Check:** AI cannot verify critical military intelligence or operational details; human expertise is required.
- ✗ **Create Images of CAF Personnel:** Do not generate realistic images or alter photos of military personnel.

Guidelines for safe usage:

Defence CDO Guideline, Generative Artificial Intelligence (AI)

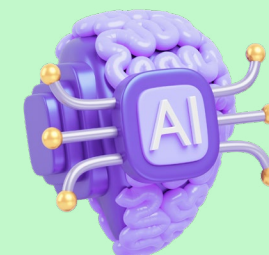

Breaches/Leaks

Sensitive info may be **exposed, misused, or threaten national security.**

Reliability

AI will always provide an answer, but it may be **wrong and lead to poor decision making.**

Overreliance

Overuse of AI could lead to the **loss of critical or analytical skillsets.**
