

Great Lakes Protection Initiative

Overview of Application-Based Funding Opportunities for 2020-21

| PREVENTING TOXIC AND NUISANCE ALGAE | REDUCING RELEASES OF HARMFUL CHEMICALS | ENGAGING INDIGENOUS PEOPLES IN ADDRESSING GREAT LAKES ISSUES | RESTORING AREAS OF CONCERN |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PROGRAM GOAL | | | |
| To decrease loadings of phosphorus to Lake Erie from Canadian sources. | To reduce releases of Chemicals of Mutual Concern (CMCs) to the Great Lakes from Canadian sources. | To increase Indigenous participation in decision making processes and actions to restore and protect Great Lakes water quality. | To restore water quality and ecosystem health in Canadian Great Lakes Areas of Concern (AOCs). |
| STRATEGIC OBJECTIVE FOR APPLICATION-BASED FUNDING | | | |
| Increase participation in the application of phosphorus load reduction measures by demonstrating innovative approaches and best management practices and promoting their broad uptake and application. | Increase participation in the application of beyond-compliance measures to reduce releases of CMCs by developing, implementing, assessing and promoting use of innovative approaches. | Enhance Indigenous capacity to address Great Lakes issues by implementing projects that engage Indigenous Peoples at the community level. | Support action at the local level to restore water quality and aquatic ecosystem health by implementing projects identified in AOC Remedial Action Plans. |
| ELIGIBLE RECIPIENTS | | | |
| <ul style="list-style-type: none">Conservation Authorities.Indigenous communities or their governments.Indigenous organizations or associations.Industry associations.Municipalities.Non-governmental organizations.Not for profit and for profit organizations.Research, academic and educational institutions. | <ul style="list-style-type: none">Conservation Authorities.Indigenous communities or their governments.Indigenous organizations or associations.Industry associations.Municipalities.Non-governmental organizations.Not for profit and for profit organizations.Research, academic and educational institutions. | <ul style="list-style-type: none">Indigenous communities or their governments.Indigenous organizations, associations, boards, commissions or authorities.Indigenous individuals. | <ul style="list-style-type: none">Conservation Authorities.Indigenous communities or their governments.Indigenous organizations or associations.Municipalities.Non-governmental organizations.Not for profit and for profit organizations.Research, academic and educational institutions. |
| ELIGIBLE PROJECT TYPES | | | |
| <ul style="list-style-type: none">Implementing and evaluating innovative approaches or technologies to reduce phosphorus loads.Implementing and evaluating the effectiveness of Best Management Practices to reduce phosphorus loads.Increasing the extent of natural features (e.g. wetlands) and/or enhancing their effectiveness in reducing phosphorus loads. <p><i>*All projects must contain an outreach plan detailing how the project will promote broad uptake and application of the phosphorus reduction measures demonstrated.</i></p> | <p>Demonstration and assessment of approaches that reduce releases of CMCs in the Great Lakes basin from Canadian sources, such as:</p> <ul style="list-style-type: none">Enhanced life-cycle / end of life management. | <ul style="list-style-type: none">Great Lakes restoration, conservation or protection projects.Science related to Great Lakes issues.Creation of networks for Indigenous experts to share knowledge/experience.Projects building awareness of Great Lakes issues. | <p>Projects that contribute to directly eliminating identified “beneficial use impairments” through Remediation, Governance and/or Monitoring.</p> <p>Remediation</p> <ul style="list-style-type: none">Restoring degraded habitat.Remediating contaminated sediment.Reducing point and non-point pollution. <p>Governance</p> <ul style="list-style-type: none">Coordinating interagency collaboration.Facilitating stakeholder and Indigenous engagement.Developing plans and strategies to implement remedial actions. <p>Monitoring</p> <ul style="list-style-type: none">Assessing status of beneficial use impairments against delisting targets.Conducting science to direct remedial action planning and implementation. |
| FUNDING DETAILS | | | |
| <ul style="list-style-type: none">Projects up to \$300,000.Multi-year projects eligible – up to 2 years. | <ul style="list-style-type: none">Projects up to \$100,000.Multi-year projects eligible – up to 2 years. | <ul style="list-style-type: none">Projects up to \$100,000.Multi-year projects eligible – up to 2 years. | <ul style="list-style-type: none">Projects typically range from \$25K to \$150K.Multi-year projects eligible – up to 3 years. |
