

We're taking **ACTION** on **AIR POLLUTION**

CO carbon monoxide
NO_x nitrogen oxides
PM_{2.5} particulate matter less than or equal to 2.5 microns
Smog poor air quality linked to negative health and environmental effects
SO₂ sulphur dioxide
VOCs volatile organic compounds

CANADA'S TIER 3 VEHICLE AND FUEL STANDARDS

The Government of Canada is taking action to further reduce harmful air pollutant emissions.

REDUCED ANNUAL ON-ROAD VEHICLE EMISSIONS BY 2030

CANADA PROTECTS ITS AIR BY HAVING THE WORLD'S MOST STRINGENT NATIONAL AIR POLLUTANT EMISSIONS STANDARDS FOR NEW CARS AND LIGHT TRUCKS.

Lowering smog-forming air pollutant emissions from new vehicles by **AS MUCH AS 80%** over current standards

2017-2030 HEALTH BENEFITS

Preventing:

- 200,000 days of asthma symptoms
- 2.8 million days with other air pollution-related respiratory issues

Reducing sulphur in gasoline limits in 2017 **BY NEARLY 70%**

\$7.5 BILLION IN HEALTH AND ENVIRONMENTAL BENEFITS BY 2030
