

NIRJUTIQRVİK NATIONAL WILDLIFE AREA

Nirjutiqrviik National Wildlife Area

What makes Nirjutiqrviik NWA so special?

Nirjutiqrviik National Wildlife Area (NWA) was established in 1995 to protect local seabird colonies and marine mammal populations. Located off the southern tip of Ellesmere Island, Nunavut, the NWA covers more than 1783 square kilometres and includes Coburg Island, Princess Charlotte Monument and the surrounding waters within a 10-kilometre radius. Most of the island is covered in glaciers and ice fields, and the rest is rugged, mountainous terrain with peaks rising over 800 metres above sea level.

Nirjutiqrviik NWA is

- home to approximately 385 000 nesting seabirds including 11% of Canada's breeding **Thick-billed Murres** and 16% of the **Black-legged Kittiwakes**;
- one of the few known breeding sites for **Atlantic Puffins** in the Arctic;

- the location of a recurrent polynya, an area of year-round open water;
- an important feeding area for a variety of marine mammals including **Polar Bears, Walrus, Belugas, Narwhal, and Ringed, Bearded and Harp Seals**;
- part of the Cambridge Point Important Bird Area.

Nirjutiqrviik NWA is managed by Environment Canada in partnership with the Area Co-management Committee of Grise Fiord, Nunavut.

What are Environment Canada Protected Areas?

Environment Canada establishes marine and terrestrial NWAs for the purposes of conservation, research and interpretation. NWAs are established to protect migratory birds, species at risk, and other wildlife

and their habitats. NWAs are established under the authority of the *Canada Wildlife Act* and are, first and foremost, places for wildlife. Migratory Bird Sanctuaries (MBSs) are established under the authority of the *Migratory Birds Convention Act, 1994*, and provide a refuge for migratory birds in marine and terrestrial environments. The current Protected Areas Network consists of 54 NWAs and 92 MBSs comprising more than 12 million hectares across Canada.

What can I do at Nirjutiqrviik NWA?

In the Nunavut territory, the Nunavut Land Claims Agreement allows Nunavut beneficiaries to harvest wildlife for their economic, social and cultural needs. Access to Nirjutiqrviik NWA is restricted except for Nunavut beneficiaries. For all non-beneficiaries, a permit must be obtained to either access or conduct any type of activity in the NWA. More information on access and permitting for Nirjutiqrviik NWA can be obtained by contacting the Environment Canada regional office.
