

CHEMICAL HAZARDS IN FEDERALLY REGULATED WORKPLACES

Canada Occupational Health and Safety Regulations (COHSR)
Hazardous Substances

IS YOUR WORKPLACE EXPOSED TO THESE HAZARDOUS SUBSTANCES?

- Diesel engine exhaust emissions (DEEEs)
- Asbestos
- Flour and grain dust
- Nanoparticles
- Welding fumes
- Isocyanates

Infographics and posters available on Canada.ca/labour-health-safety-reports

Refer to the ***Guide to the management hazardous substances****

Methods of risk assessment/evaluation

For hazardous substances such as carcinogens, nanoparticles or other chemical agents which **do not have** established Threshold Limit Values (TLVs®) or Occupational Exposure Limits (OELs), refer to the publication:

Control banding guideline*

For hazardous substances such as asbestos, flour dust, grain dust or other chemical agents which **do have** established Threshold Limit Values (TLVs®) or Occupational Exposure Limits (OELs), refer to the publication:

Occupational chemical agent compliance sampling guideline*
