Objet : **Modification proposées à l'*Ordonnance sur les redevances à payer pour la commercialisation des œufs d'incubation de poulet de chair au Canada*au et au *Règlement des Producteurs d'œufs d'incubation du Canada sur le contingentement***

Cher Monsieur Bilkes,

Lors de sa réunion du 14 janvier 2026, le Conseil des produits agricoles du Canada (le Conseil) a examiné les modifications proposées au Règlement des Producteurs d'œufs d'incubation du Canada sur le contingentement (le Règlement sur le contingentement) et l'Ordonnance sur les redevances à payer pour la commercialisation des œufs d'incubation de poulet de chair au Canada (l'Ordonnance sur les redevances), tel que demandé dans vos lettres datées du 26 novembre et du 17 décembre 2025, respectivement.

Après un examen approfondi des justifications fournies par les Producteurs d'œufs d'incubation du Canada (POIC) et suite à des analyses internes, les membres du conseil ont approuvé les modifications proposées à l'Ordonnance sur les redevances ainsi qu'au Règlement sur le contingentement. Le Règlement sur le contingentement entrera en vigueur à la date de son enregistrement. L'Ordonnance sur les redevances entrera en vigueur le 1er février 2026 ou à la date de son enregistrement.

Les membres du Conseil ont convenu que les modifications étaient nécessaires à la mise en œuvre du plan de commercialisation tel qu'énoncé dans la Proclamation visant les Producteurs d'œufs d'incubation du Canada.

Pour toute question, n'hésitez pas à communiquer avec moi ou avec Lisa Melanson-Daigle, secrétaire du Conseil, par courriel, à l'adresse fpcc.secretariat.cpac@fpcc-cpac.gc.ca.

Sincères salutations,

Re: Prior-Approval of CHEP's Revised 2026 Allocations

Dear Mr. Douglas,

The Canadian Hatching Egg Producers (CHEP) is requesting prior-approval for its 2026 revised allocations. Enclosed are the provincial quota allocations for 2026 revised allocations in the Schedule to the Canadian Hatching Egg Producers Quota Regulations, which were approved by CHEP on November 20, 2025.

During CHEP's recent Open Board meeting held in November, the Directors reviewed the latest market information and considered recommendations from CHEP's Advisory Committee. They identified several strong factors supporting growth in the chicken industry: an inflation rate near the 2% target, stable storage stocks below historical highs, and high beef prices, for which chicken is a substitute good. These economic indicators are expected to support continued growth in chicken demand.

Following their discussion, the CHEP Board of Directors set the 2026 revised allocation based on chicken production of 1,495 million kilograms (eviscerated), which represents growth of 3.7% above the 2025 projected chicken production (1,441 million kilograms). The provincial broiler hatching egg allocations were calculated as per CHEP's existing Schedule B.

Based on the preceding rationale, CHEP is seeking prior-approval for its 2026 revised allocations.

Do not hesitate to contact me if you have any questions.

Sincerely,

Teddy Markey

Re: Prior Approval for Amendments to CHEP's Levies Order

Dear Mr. Douglas,

The Canadian Hatching Egg Producers (CHEP) are seeking prior approval for a series of amendments to *the Canadian Broiler Hatching Egg Marketing Levies Order*. As you are aware, a levy increase was implemented last year following a fixed rate that had been in place for the preceding nine years. Similarly, in the current year, with the approval of the CHEP Board of Directors, the national levy rate is scheduled to increase from $0.0034 to $0.0038 per broiler hatching egg, effective February 1, 2026, or on the date of registration, whichever occurs later. Despite high inflation in recent years, CHEP levy rates have remained relatively stable due to the prior fixed period.

Following the national levy increase, adjustments were requested to certain combined levy rates. Quebec and Alberta have advised that their provincial levies must be reduced to offset the impact of the national increase; as a result, there will be no change to the combined levy rates in those provinces.

In Ontario, the reduction to the provincial levy exceeds the impact of the national increase, as determined by its Board. By contrast, following a decision of its Board, Saskatchewan has decided to increase its provincial levy.

As a result, the combined levy rates for the six signatory provinces will be as follows:

Province	National	Provincial	Combined
Ontario	$0.003800	$0.004600	$0.008400
Quebec	$0.003800	$0.008650	$0.012450
Manitoba	$0.003800	$0.011560	$0.015360
British Columbia	$0.003800	$0.016800	$0.020600
Alberta	$0.003800	$0.017600	$0.021400
Saskatchewan	$0.003800	$0.030000	$0.033800

In addition, based on the average of the combined levy rates for the six signatory provinces, the levy rate for broiler hatching eggs marketed from the unregulated area into the regulated area will change from $0.016568 per broiler hatching egg to $0.018668 per broiler hatching egg.
