

Lithium-ion Batteries

Don't Go up in Smoke!

Lithium-ion batteries are found in many rechargeable household devices. If mishandled, they can overheat, catch fire and explode!

Reduce your fire risk:

- ✓ Handle with care. Do not modify or tamper with batteries.
- ✓ Don't use batteries if showing signs of damage like swelling or overheating.
- ✓ Charge away from soft surfaces and bedding to prevent overheating.
- ✓ Store your battery at room temperature.
- ✓ Check with your municipality on how to safely dispose of your batteries.
- ✓ If replacing a charger, check that the voltage (V) and current (A) are compatible with your device.

Commonly found in:

Use a charger with a Canadian certification mark:
