

# Lithium-ion Batteries

## Don't Go up in Smoke!

**Lithium-ion battery fires in larger, more powerful rechargeable products, like e-bikes, e-scooters and large power tools, can be severe and hard to extinguish. Follow the manufacturer's instructions for charging, use and storage.**

### **Reduce your fire risks:**

- ✓ Use the battery and charger that came with your device. Never use a damaged battery and don't modify, tamper with or build your own battery.
- ✓ If you need a replacement battery, contact the manufacturer or product retailer.
- ✓ Charge your batteries away from exit doors in case of fire. Store at room temperature.
- ✓ Check with your municipality on how to safely dispose of your batteries.
