HELP REDUCE THE SPREAD OF COVID-19

TOGETHER, WE CAN TAKE THE FOLLOWING STEPS TO SLOW THE SPREAD OF COVID-19

- follow the advice of your local public health authority
- wash your hands often with soap and water for at least 20 seconds
- use alcohol-based hand sanitizer if soap and water are not available
- try not to touch your eyes, nose or mouth
- cough and sneeze into your sleeve and not your hands
- avoid close contact with people who are sick and stay home where possible
- avoid non-essential community and cultural gatherings and keep a physical distance between each other (approximately 2 metres)
- wash your hands often with soap and water for at least 20 seconds
- use alcohol-based hand sanitizer if soap and water are not available
- try not to touch your eyes, nose or mouth
- cough and sneeze into your sleeve and not your hands
- avoid close contact with people who are sick and stay home where possible
- avoid non-essential community and cultural gatherings and keep a physical distance between each other (approximately 2 metres)

SYMPTOMS
Symptoms of COVID-19 may be very mild or more serious and may take up to 14 days to appear after exposure to the virus.

- FEVER (greater or equal to 38°C)
- COUGH
- DIFFICULTY BREATHING

IF YOU HAVE SYMPTOMS
Isolate at home to avoid spreading illness to others.

Avoid visits with older adults, elders, or those with medical conditions. They are at higher risk of developing serious illness.

Call ahead before you visit a health care professional or call your local public health authority.

If your symptoms get worse, contact your health care provider or public health authority right away and follow their instructions.
