Nutrition Labelling

Table of Reference
Amounts for Food

Health Canada is the federal department responsible for helping the people of Canada maintain and improve their health. We assess the safety of drugs and many consumer products, help improve the safety of food, and provide information to Canadians to help them make healthy decisions. We provide health services to First Nations people and to Inuit communities. We work with the provinces to ensure our health care system serves the needs of Canadians.

Notes:

¹ Unless otherwise noted, the reference amounts are for the ready-to-serve or almost ready-to-serve form of the food. If not listed separately, the reference amount for the unprepared form, such as dry mixes, concentrates, dough, batter, and fresh or frozen pasta, is the amount required to make one reference amount of the prepared form.

² Excludes any liquid in which the solid food may be packed or canned, unless the liquid is customarily consumed with the solid food.

³ The terms piece(s) or unit(s), container, package, pan, fruit and other similar terms are used as generic descriptors.
