

WEST NILE VIRUS AND OTHER MOSQUITO-BORNE DISEASE NATIONAL SURVEILLANCE REPORT

NOV 8 TO NOV 14, 2015 – REPORT WEEK 45

CANADA

HUMANS

During surveillance week 45, ending on Nov 14, 2015, two (2) human clinical cases of West Nile virus were reported to the Public Health Agency of Canada (the Agency). Of these one case was reported in Quebec [Montreal (1)] and one case in Ontario [Durham Region (1)].

As of surveillance week 45, a total of 76 human clinical cases have been reported to the Agency: Quebec (39), Ontario (32), and Manitoba (5). Of these, forty two (55%) were classified as West Nile virus Neurological Syndrome, twenty-six (34%) as West Nile virus Non-Neurological Syndrome, and eight (11%) as Unclassified. In addition, four (4) asymptomatic infections from two provinces have been reported: three in Quebec [Laval (1) and Montérégie (2)] and one in Ontario [Toronto].

MOSQUITOES

As of surveillance week 45, 173 (0.86%) out of the 20,046 mosquito pools have tested positive for West Nile virus in Canada: Quebec (33), Ontario (94), Manitoba (30), and Saskatchewan (16).

DEAD BIRDS

As of surveillance week 45, the [Canadian Wildlife Health Cooperative](#) and the Quebec Ministry of Health and Social Services have reported a total of 47 dead birds that were tested positive for West Nile virus: Quebec (18), Ontario (28), and Saskatchewan (1).

DOMESTIC ANIMALS

As of surveillance week 45, the [Canadian Food Inspection Agency](#) and Le ministère de l'Agriculture, des Pêcheries et de l'Alimentation du Québec have reported a total of 11 horses that were tested positive for West Nile virus: Quebec (1), Ontario (3), Manitoba (1), Saskatchewan (3) and Alberta (3).

ISSN: 2368-2841

Seven horses from three provinces have tested positive for Eastern Equine Encephalitis virus: Ontario [Richmond (1), Carlsbad Springs (1), Gananoque (1), Brinston (1)], Quebec [Saint-Lambert (1)] and Nova Scotia [New Germany (1), South Brookfield (1)]

UNITED STATES

As of November 17, 2015, the [Centers for Disease Control and Prevention \(CDC\)](#) has reported a total of 1,812 human cases of West Nile virus:

Alabama (10), Arizona (85), Arkansas (18), California (570), Colorado (90), Connecticut (10), Delaware (2), District of Columbia (4), Florida (9), Georgia (14), Idaho (13), Illinois (67), Indiana (18), Iowa (11), Kansas (31), Kentucky (0), Louisiana (43), Maine (1), Maryland (46), Massachusetts (9), Michigan (17), Minnesota (6), Mississippi (38), Missouri (28), Montana (3), Nebraska (67), Nevada (7), New Jersey (25), New Mexico (13), New York (27), North Carolina (4), North Dakota (23), Ohio (35), Oklahoma (82), Oregon (1), Pennsylvania (30), South Carolina (0), South Dakota (40), Tennessee (6), Texas (241), Utah (8), Virginia (22), Washington (24), Wisconsin (7) and Wyoming (7).

Of these, 1,181 (65%) were diagnosed as neuroinvasive disease cases, 631 (35%) as non-neuroinvasive disease cases. 98 fatal cases were reported. In addition, 311 presumptive viremic blood donors have been identified.

EUROPEAN UNION, EUROPEAN ECONOMIC AREA AND NEIGHBOURING COUNTRIES

As of November 19, 2015, the [European Centre for Disease Prevention and Control](#) has reported 108 cases of West Nile fever in humans in the EU Member States: Austria, Belgium, Bulgaria, Croatia, Republic of Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden and the UK, as well as 193 cases in the neighboring countries: Armenia, Azerbaijan, Belarus, Georgia, Moldova, Ukraine, Algeria, Egypt, Israel, Jordan, Lebanon, Libya, Morocco, Palestine, Syria and Tunisia, since the beginning of the 2015 transmission season.

Northwest Territory	0	0	0	0	0	0
Nunavut	0	0	0	0	0	0
Total	42	26	8	76	6	4

¹ Total clinical cases is the sum of both probable and confirmed: West Nile virus neurological and non-neurological syndromes, along with any unclassified or unspecified cases.

² Likely related to travel outside the Province/Territory. These cases are included in either the total clinical cases or West Nile virus asymptomatic infections.

³ Satisfies West Nile virus diagnostic test criteria in the absence of clinical criteria. This category could include asymptomatic blood donors whose blood is screened using a nucleic acid amplification test, by blood operators (i.e. Canadian Blood Services or Hema-Quebec) and is subsequently brought to the attention of public health officials. Blood operators in Canada perform a supplementary West Nile virus specific nucleic acid amplification test following any positive donor screen test result.
