

## **Summary of Expertise, Experience and Affiliations and Interests for the Scientific Advisory Panel on Bioequivalence Requirements for Gender-Specific Drug Products (SAP-GSDP)**

### **Purpose of the Summary**

The following summarizes the information about expertise or experience, affiliations and interests relevant to the Scientific Advisory Panel on Bioequivalence Requirements for Gender-Specific Drug Products (SAP-GSDP) mandate declared by committee members. Health Canada considered these declarations as part of the selection process. The Health Products and Food Branch has made this summary available as part of its commitment to be transparent about the membership of its advisory bodies.

### **Assessment of affiliations and interests prior to each meeting**

Prior to each committee meeting, Health Canada assesses members' affiliations and interests, including direct financial interests, as they may apply to agenda items for discussion. Depending on the nature of the member's affiliations or interests, the Chair of the committee in consultation with the members, may limit the participation of a member in the meeting or ask him/her to make a verbal statement of affiliations and interests at the beginning of the meeting. Members' affiliations and interests are reviewed on an annual basis and updated as required based on changes in the status of their affiliations and interests.

In accordance with the Health Products and Food Branch Review of Regulated Products: Policy on Public Input and Guidance on Advisory Bodies, a person with a direct financial interest in the outcome of a review of a regulated product may be a member of an advisory body whose broader mandate encompasses matters of policy, management, or program development. However, such a member would not be asked to participate in any discussion, formulation of advice, or recommendations to Health Canada relating to that review.
