Prescription Drug List (PDL): Avilamycin

The purpose of this Notice of Amendment is to notify the addition of avilamycin to both the Human and Veterinary Prescription Drug List (PDL).

Avilamycin or its salts or derivatives
Avilamycine ou ses sels ou dérivés

Rationale:

A scientific review of this drug against the criteria set out in C.01.040.3 of the *Food and Drug Regulations* indicates its use without professional supervision will more likely result in abuse or overuse of this drug and subsequently the development and spread of resistant bacteria of both animal and human health concern. Therefore prescription status has been determined for this drug and its approved use. Additional information on how Health Canada now determines prescription status (or non-prescription status) is available in the *Guidance Document: Determining Prescription Status for Human and Veterinary Drugs* (http://www.hc-sc.gc.ca/dhp-mps/prodpharma/pdl-ord/pdl_gd_ord_ld-eng.php).

Should you have any questions on these amendments to the Prescription Drug List please contact:
