# Lytton Homeowner Resilient Rebuild Program

The Government of Canada is committed to helping Lytton build back better. The Homeowner Resilient Rebuild Program provides top-up grants for eligible homeowners who wish to rebuild fire-resilient or fire-resilient and Net Zero Homes. The program, delivered by PacifiCan, includes support towards home design, construction, and Net Zero certification.

### Who is eligible?

- · Owners of a residential property:
  - located in the Village of Lytton or within 15km of the Village,
  - that was fully destroyed by the Lytton Creek Wildfire on June 30, 2021 and
  - who plan to rebuild a primary residence to fire-resilient or fire-resilient and Net Zero standards.

# Eligible homeowners accepted into the program will receive grants towards building one of three home types:

- 1. Fire-resilient
- 2. Net Zero Ready and fire-resilient
- 3. Net Zero and fire-resilient
- \* Net Zero Ready Homes are built to the same standards as Net Zero Homes, but without a renewable energy system installed.

## **Application Checklist**

- Proof of identity
  - Two pieces of government issued ID including one with a photo
- Proof of the existence and size of residential structure before the Lytton Creek Wildfire
  - BC Property Assessment information including address and structure size in 2020
- ✓ Proof of home ownership and address
  - · State of title certificate or
  - Attestation form signed by insurance company confirming ownership
- ✓ Completed application form
- \* Applicants must also provide proof of specific program building requirements prior to receiving grant payments.

#### What makes a home fire-resilient?

Fire-resilient construction helps prevent damage to your home and belongings, and buys valuable time for evacuation in the event of a fire. For example, fire-resilient homes include use of:

- Non-combustible materials such as metal or asphalt roofing
- Design features such as enclosed gutters and eaves

#### Why build a Net Zero Home?

Net Zero Homes produce as much clean energy as they consume and include renewable energy systems such as solar panels.

#### Greater comfort and healthier living

- Tightly built and well insulated, which quiets noise and reduces drafts
- · Provides power during outages
- Filters air to reduce allergens such as dust, pollen and outdoor pollution

#### **Reduces costs**

- Lowers utility bills
- Protects homeowners from energy price increases
- More durable due to high performance and better insulation

#### **Environmentally responsible**

- Reduces energy consumption
- Improves resilience to climate events such as heat waves
- · Preserves natural resources

# Accessing the Lytton Homeowner Resilient Rebuild Program

#### Review eligibility

Contact PacifiCan to discuss your rebuild plans and receive an application form

#### Fill out the application form

Applicants will receive confirmation of program eligibility and value of funding available to them (if applicable)

Choose a fire-resilient or fire-resilient + Net Zero Home

#### Pathway 1

Build a fire-resilient home

Fulfill program requirements

Receive builder attestation that states fire-resilient requirements have been met (checklist provided)

Receive a grant payment -\$10,000

#### Pathway 2

Work with a Canadian Home Builders' Association (CHBA) qualified Net Zero builder and EnerGuide energy advisor

**Design a Net Zero Home** 

Receive a grant payment - \$5,000

**Choose a Net Zero Ready or Net Zero Home** or switch to fire-resilient only

Build a fire-resilient and Net Zero Ready or fireresilient and Net Zero Home

#### Fulfill program requirements

Receive fire-resilient attestation and proof of mid-build EnerGuide Assessment and CHBA Net Zero Ready/Net Zero label

Receive a grant payment -\$24/ sq ft + \$12,500 (Net Zero Ready) OR \$24/ sq ft + \$45,000 (Net Zero) AND \$10,000 (fire-resilient)

Each homeowner's rebuild journey will be unique, and PacifiCan is one of many partners supporting the process. Contact us to discuss how this program may fit with your rebuild plans.

The Lytton Homeowner Resilient Rebuild Program is now accepting applications.
