

REGIONAL ARTIFICIAL INTELLIGENCE INITIATIVE (RAII)
Supplementary Questionnaire

Completion of this questionnaire is **mandatory** for your application for funding to the Regional Artificial Intelligence Initiative (RAII). The purpose of this questionnaire is to supplement information focusing on security, privacy and data governance; and responsible and ethical AI.

Legal name of applicant organization:	
---------------------------------------	--

1. Has your organization developed plans, policies, procedures, systems, or governance structures to safely collect, protect, store, and share sensitive or confidential data and prevent unauthorized use or access?	Yes ☐	No ☐
If yes, please describe these measures, the applicable legislative and regulatory standards in Canada and target markets, and how your organization will meet those standards (e.g., standards laid out in Canada's Personal Information Protection and Electronic Documents Act (PIPEDA) and related regulations and in BC's Personal Information Protection Act (PIPA) and related regulations). (maximum 1,000 characters including spaces)		
2. Has your organization developed a strategy to ensure the ethical and responsible development, adoption, and deployment of AI technologies in compliance with applicable standards in Canada and target markets?	Yes ☐	No ☐
If yes, please describe the strategy, how it is implemented, and how your organization will adapt as legislative and regulatory requirements evolve. For, example organizations might adhere to standards like those set out in the Government of Canada's Voluntary Code of Conduct on the Responsible Deployment and Management of Advanced Generative AI Systems, or other such codes. Organizations might also set up an Ethics Review Committee as part of their governance model to assess whether proposed AI systems and uses are "high risk," and how those risks could be mitigated. (maximum 1,000 characters including spaces)
