

# Provincial and Territorial Routine Vaccination Programs for Healthy, Previously Immunized Adults

This table summarizes the current routine (publicly-funded) vaccination schedule for healthy, previously immunized adults in all provinces and territories (P/T) across Canada. Provincial and territorial immunization programs for publicly-funded programs can change. Schedules for each province or territory can be found on their [website](#) and individuals are encouraged to talk to their health care providers about recommended immunizations for them. This table does not include adults who were previously unimmunized, adults with underlying medical conditions (at-risk), travellers, health care workers, etc. Please refer to the [NACI recommendations](#) or specific P/T schedules for more details on these groups.

The [Canadian Immunization Guide](#) is an online resource for health care professionals and includes more information about vaccines, vaccine safety and the nationally [recommended immunization schedules](#). Additional information on vaccine safety, epidemiology, and guidance on immunization and vaccines is available on [Canada.ca](#). (last update September 2018)

		Provincial & Territorial Vaccination Schedules for Healthy Adults												
Abbreviations	Description	BC	AB	SK	MB	ON	QC	NB	NS	PE	NL	YT	NT	NU
Tdap <sup>1</sup>	<a href="#">Tetanus, diphtheria</a> (reduced toxoid), acellular <a href="#">pertussis</a> (reduced toxoid) vaccine	N/A	One booster dose per adult lifetime	One booster dose per adult lifetime and each pregnancy	One booster dose per adult lifetime	One booster dose per adult lifetime	One booster dose per adult lifetime and each pregnancy	One booster dose per adult lifetime and each pregnancy	One booster dose per adult lifetime and each pregnancy	One booster dose per adult lifetime and each pregnancy	Every 10 years	One booster dose per adult lifetime and each pregnancy	Every 10 years and each pregnancy	One booster dose per adult lifetime and each pregnancy
Td	<a href="#">Tetanus</a> and <a href="#">diphtheria</a> (reduced toxoid) vaccine	Every 10 years	Every 10 years	Every 10 years	Every 10 years	Every 10 years	Every 10 years	Every 10 years	Every 10 years	Every 10 years	N/A	Every 10 years	N/A	Every 10 years
Inf	<a href="#">Influenza</a> vaccine	Annually for adults aged 65 years+	Annually for all adults	Annually for all adults	Annually for all adults	Annually for all adults	Annually for adults aged 75 years +	Annually for adults aged 65 years+	Annually for all adults	Annually for all adults	Annually for all adults	Annually for all adults	Annually for all adults	Annually for all adults
Pneu-P-23	<a href="#">Pneumococcal</a> polysaccharide 23-valent vaccine	65 years+ One dose	65 years+ One dose	65 years+ One dose	65 years+ One dose	65 years+ One dose	65 years+ One dose	65 years+ One dose	65 years+ One dose	65 years+ One dose	60 years+ One dose	65 years+ One dose	65 years+ One dose	50 years+ One dose
Zos	<a href="#">Herpes Zoster (Shingles)</a> vaccine	N/A	N/A	N/A	N/A	65 to 70 years One dose	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A

1	<a href="#">NACI recommends</a> that all adults should receive one dose of Tdap vaccine if they have not previously received pertussis-containing vaccines in adulthood and with every pregnancy
N/A	Vaccine is not publicly funded in this province/territory
