In the article "Outbreak of Seoul virus among rats and rat owners — United States and Canada, 2017" (1) the following correction was made on March 1, 2018 upon the request of the authors.

In the section titled "Public Health response", the date in the second sentence of the first paragraph was corrected as follows:

On February 10, 2017, the World Health Organization was notified of the US and Canadian infections and investigations as required by International Health Regulations.
