

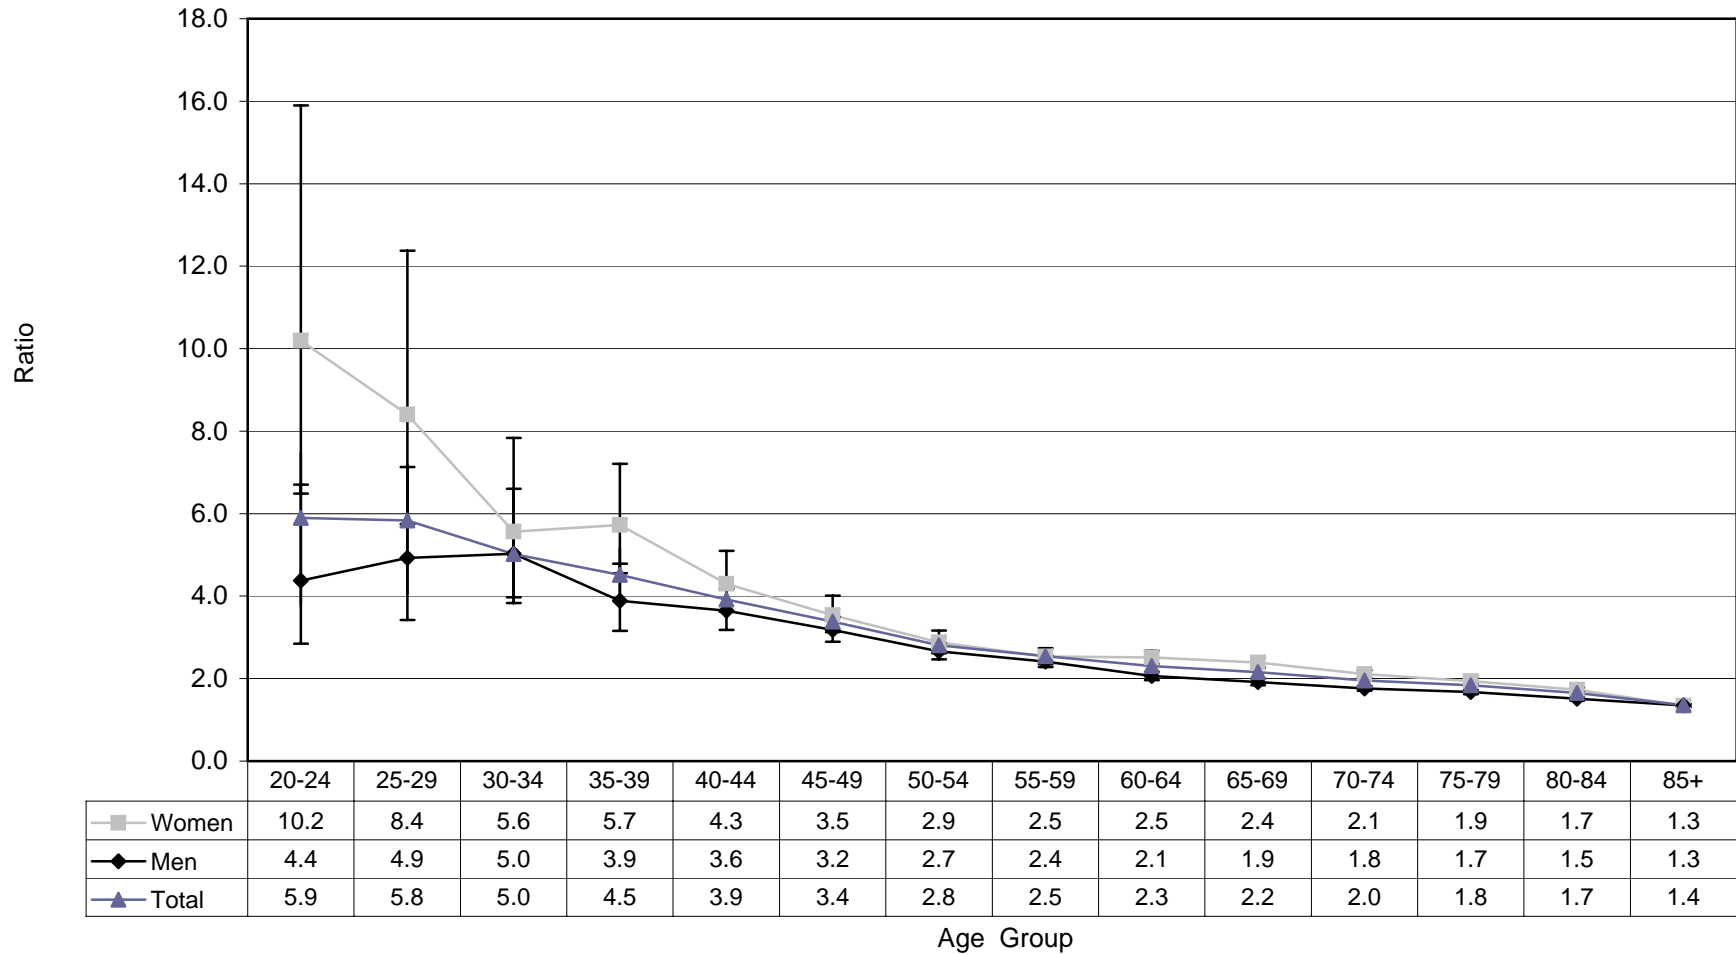

Figure 6. Ratio of Death Rates of Adults Aged 20 and Older with Diagnosed Diabetes Compared to Those Without Diagnosed Diabetes, Canada, 2004-2005

Source: Public Health Agency of Canada, using NDSS data files contributed by all provinces and territories, as of October 31, 2007

‡The 95% Confidence Interval shows an estimated range of values which is likely to include the true ratio of death rates 19 times out of 20.
