**Subject:** Environmental impact issues

The government claims that they wanted to go green. Yet they want nuclear power  
I like you care about the environment. Think that is a huge mistake. Look what happened at the  
nuclear plant with the minor explosion. And leak I also disagree with them wanting the pipelines  
. Such as kinder Morgan and the TPP. Oil is dirty energy. And natural gas is unstable. Neither of  
them are beneficial to the ecosystem. Also I disagree with the commercial hunting. Or the off  
shore drilling in the arctic. If they really cared  
about THE PLANET AND PRESERVATION OF THE LAND AND WATER. THEY HAVE A  
WEIRD WAY OF SHOWING IT.
