Subject: Draft TOR Environmental Review Process

Sir/Madame,

Have read with interest the news that this review is moving forward.

A couple of things came to mind upon review of the TOR:

1. could we have a modern, forward looking and very inclusive definition of an environmental assessment
2. it would facilitate this work, and a consultation with the public and other stakeholders to have clear guiding principles for our EA
3. it would be very helpful to have not only summaries of what various stakeholders have provided to the review but also to provide an opportunity for stakeholders to respond to a 'first draft', to ensure that what the panel heard is what was said but also to validate that input step; it would also foster support of the outcome by such stakeholders

Thank you,
Kay Watson-Jarvis
