Subject: Environmental assessment review

I realize that the deadline for comments on this process is in fact today, and as I have been away I have not had time to formulate a well thought out response. Please simply allow me to comment that being open to public input is tremendously important and I commend the Minister for initiating this. Secondly the disgusting process used by the conservative government...of secrecy and confusion and hiding detrimental legislation in so called omnibus legislation should never be repeated again...what a cost to our environment. And thirdly I have read and totally agree with the recommendations of West Coast Environmental Law n organizTion which I whole heartedly support.

With thanks,

Vickeri Cochrane,
